Orban Establishes Legacy Service Center

New center headed by Jay Brentlinger will provide service for all legacy Orban products.

Pennsauken, NJ – Orban, the leader in world-class audio processing, will establish a Legacy Service Center in Chandler, Arizona. The center will service all legacy Orban products (Optimod 8500 and earlier).

Jay Brentlinger, President of Circuit Research Labs, Inc., will also serve as president of this new entity, Orban Legacy Service, Inc. “Orban products are legendary for their sound and reliability, with some models built in the 1970s still in service today after more than 42 years of continuous 24-hour operation,” Brentlinger said. “Orban’s factory service kept many of these same models serviced, repaired and updated over the years, and those products may still be in service for many more years to come. Our goal in forming this new division is to ensure that our loyal customers will continue to have the same quality of factory parts and service that they have come to expect over the years.”

Brentlinger said in addition to providing parts and service, the service center will offer trade-in programs for older models that have reached end-of-life.

“Jay and his team are well-equipped to keep legendary Orban products running for many years to come,” said David Day, Orban’s President. “Our sonic quality combined with world-class service and reliability will ensure that Orban will remain the world leader in audio processing for Radio, TV and Internet broadcasting.”

###

About Orban: For over 45 years, Orban has set the benchmark for professional audio processing worldwide and continues to provide state-of-the-art audio solutions for live performance venues and content creators, as well as radio, TV and Internet broadcasters. Applications include audio processing, loudness measurement and control, multichannel surround audio and digital audio processing and monitoring for industry leaders including ABC, BBC, CBS, Disney, ESPN, FOX, iHeart, NBC, NHK and SKY. Orban Labs currently has offices in San Francisco and Stuttgart, Germany; its headquarters are located in Pennsauken, NJ right across the river from Philadelphia, PA.
